

**12.1. RECOMMENDATION:**

**Should AUXILIARY NURSES initiate and maintain injectable contraceptives using a compact, prefilled, autodisable device (CPAD) such as Uniject?**

**Problem:** Poor access to contraception  
**Option:** Auxiliary nurses initiating and maintaining injectable contraceptives using a CPAD  
**Comparison:** Care delivered by other cadres or no care  
**Setting:** Community/primary health care settings in LMICs with poor access to health professionals

Recommendation	<i>We recommend against the option</i>	<b>No recommendation has been made</b>	<i>We recommend the option</i>
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
No recommendation was made for this option.			
<b>Justification</b>	We need research about the effectiveness of delivering injectable contraceptives using a compact, prefilled, autodisable device (CPAD) such as Uniject before considering the cadres that can undertake delivery. The panel therefore did not make a recommendation. It was also noted that studies on this question are underway.
